

## Determination of Malic Acid (Classic Reprint) (Paperback)

Filesize: 7.54 MB

### **Reviews**

*The ideal ebook i actually read through. It really is written in simple words and phrases and not confusing. Its been written in a remarkably simple way and it is just after i finished reading this ebook where in fact modified me, affect the way i think.  
(Alice Cremin)*

## DETERMINATION OF MALIC ACID (CLASSIC REPRINT) (PAPERBACK)

To read **Determination of Malic Acid (Classic Reprint) (Paperback)** PDF, remember to refer to the hyperlink under and save the ebook or gain access to other information that are in conjunction with DETERMINATION OF MALIC ACID (CLASSIC REPRINT) (PAPERBACK) book.

Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Determination of Malic Acid In the earlier experiments of this investigation an attempt was made to use uranyl nitrate and potassium hydroxid as reagents, as recommended by Walden. This author states that a maximum rotation is obtained by the use of 4 molecules of potassium hydroxid and 1 to 4 molecules of uranyl nitrate for each molecule of malic acid. He prefers the nitrate to the acetate because of the greater solubility of the former salt. Uranyl nitrate, however, has one serious disadvantage. Its solution in water always contains nitric acid due to hydrolysis. It is impossible to obtain the maximum polarization in the presence of free mineral acid and it is therefore necessary, as Walden pointed out, to neutralize the solution when uranyl nitrate is used. The color of the solution always makes this Operation very difficult. Many attempts were made to use uranyl nitrate, but with indifferent results. After addition of the uranyl nitrate solution to that containing malic acid, a solution of potassium hydroxid was added drop by drop until a precipitate just began to form. This was dissolved either by addition of a drop of, nitric acid or of uranyl nitrate solution. The results, however, were very irregular. In some cases the theoretical recovery of malic acid was obtained, while in others the results were very much too low. Attempts to neutralize the solution, using various indicators, were made with similar results. No better success was attained when the amount of alkali required to neutralize both the uranyl nitrate and the malic acid solution was determined in advance and the calculated amount added to the mixture.
